IT space

Engineered for excellence. Designed for your growth.

Discover a data center designed to fuel your growth. Our Pittsburgh facility empowers you to scale seamlessly, meet the demands of hyperscale, AI, and enterprise applications helping you innovate with confidence. Experience exceptional performance, reliability, and security — enabling operational efficiency and limitless possibilities for your business.

Massive power capacity

Start with 2.4 MW of available IT capacity and scale up to a total of 12 MW. The site is backed by 20 MW of robust utility capacity, ensuring consistent and reliable energy delivery.

Uncompromising reliability

Built on a Tier III-aligned, N+1 concurrently maintainable design, PIT1 guarantees exceptional uptime with a resilient service-level agreement, maintaining business continuity without compromise.

High-density ready

Our facility is engineered for the future. Liquid-cooling ready and with racks that accommodate up to 52U, we deliver the flexibility and performance needed for the most demanding compute environments.

Carrier neutral connectivity

Gain the freedom to optimize your network strategy with dual, diversely routed entry points and two meet-me rooms, providing access to a wide range of carriers and connectivity options.

Fortified security

Your assets are protected by perimeter fencing, 24/7 CCTV surveillance, and multi-layered interior access controls, ensuring comprehensive protection for both physical and digital infrastructure, continuity without compromise.
